About the College

Siddhartha Institute of Engineering & Technology was established in 2008, promoted by Siddhartha Group of institutions which has been in educational field for the past 25 years and produced 20,000 graduate students since its inception. The college is offering UG Courses CSE, CSE-AI&ML, CSE-DS, ECE, EEE, MECH, CIVIL, and PG Courses THERMAL, CAD/CAM, STRUCTURAL, COMPUTER SCIENCE, POWER SYSTEMS, VLSI, VLSI & EMBEDDED & MBA branches and aiming for perfection in engineering and management education. It is constantly striving for all round development of the students. Apart from regular academic courses, the college encourages co-curricular activities like seminars, workshops, symposiums etc.

About Department

The Department of ECE has commenced right from the inception of this college in 2008 with an intake of 60 and subsequently increased to 120 by 2009. The Department also offers PG course (VLSI, VLSI & EMBEDDED) with an intake of 18. The Department is well equipped with 12 labs, each with a capacity of 30 systems and updated licensed software's are installed. The Department provides R&D lab with an internet connection of 24 systems for staff and students to take up their research work. The Department encourages the staff and students to publish papers and to participate in various workshop and events. The Department has a very good track record of placements into various companies like Infosys, Samsung, Astra Microwave pvt limited, TCS etc. The Department also has a tie up with various Multi National Companies which offers training in latest technologies, placements and Internships. The department possesses PhD's, 3 faculty pursuing PhD's and 20 M.Tech faculty.

About the Faculty Development Program

IOT is one of the latest technology that is ruling the world. This FDP enables the participants to understand about the details of Internet of things technology and related sensors and actuators. The main objective of the FDP is to provide practical insight into the tools related to Arduino, Zyr boards, Raspberry Pi SBC. At the end of the program participants will also be able to simulate through Python programming.

Eligibility for Participants:

The faculty members from CSE and ECE Engineering of the AICTE approved institutions, research scholars, UG Students and participants from Government and industry members.

Registration Link:

Interested candidates can register through the registration link provided below:

Note : No Registration fee

Conduction of FDP:

General Instructions:

Maximum 200 participants will be allowed to attend the FDP on a first come first serve basis. Attendance 80% or more is mandatory. A test will be conducted on the last day and those who score more than 60% will be termed as successful candidates. Participation Certificate will be issued for all the participants.

REPORT ON FDP on “VLSI DESIGN EVOLUTION AND CMOS IC DESIGN”

The Siddhartha Institute of Engineering and Technology organized a one-week Faculty Development Program titled “VLSI DESIGN EVOLUTION and CMOS IC DESIGN “which was conducted from 08/02/2021 to 13/02/2021.

The FDP had a fair number of participants which included research scholars, faculty from SIET and other colleges.

The FDP was aimed to provide insights to all participants about the levels of integration and evolution of VLSI design including low power consumption constraints and scaled designs.

Different evolution methods were covered along with tools. Issues such as gating circuits, lowpower consumption methods were also covered. The CMOS IC design dealt with the concepts of shrinkage of transistor sizing, packaging density of the chip, the history of CMOS technology along with its application in semiconductor industry. Large scale VLSI integration techniques current and future trends of RF MOSFET and applications of high-power RF MOSFETS in electronics and telecommunication were interesting and challenging topics which were covered in the FDP.

Futuristic application in time with advanced technology in low power VLSI and CMOS IC design concepts were interesting topics that were also included in the FDP. The participants then got a clear conceptual review of the evolution of VLSI design and CMOS IC design after attending the FDP.

Topics covered:

1. Evolution of Electronics & VLSI Design.
2. Very large-scale integration – Monolithic and Hybrid IC.
3. VLSI Design isolation, Oxide isolation, Diode Isolation, Building blocks, Layout of Passive element.
4. Resistor geometry, Power dissipation, Power density, Tolerance.
5. Design of semiconductor diffused resistors, thin film resistor and Monolithic Capacitor. Fabrication of thick oxide MOSFET and CMOS.
6. Design of Silicon Integrated circuits, Concept of buried layer, Initial Artwork, Isolation Diffusion.
7. Analytical modelling of MOS Devices in VLSI, Deep sub-micron modelling, Advance MOSFET Design Structure.

8. CMOS Digital IC Design, Threshold Voltage of Digital IC, Inverter Design.

We have invited renowned and experienced resource person namely Dr.MD.ILYAS, Professor in ECE dept, Shadhan college of engineering.

The inaugural ceremony was on 13 Feb 2021 and was hosted by Honourable Chairman Dr. G.Nagaiagh andPrincipal Dr.K. Eshwarprasad, in presence of Chief Guest of the function Dr.MD.ILYAS, Guest of Honor &Prof. Department of Electronics and Communication Engineering, Shadhan college. Dr. Farha Anjum, Coordinator and Mr. T.Krishnarjuna Rao Co-Coordinator of the FDP, Faculty members of the institute and Participants were present.

The valedictory event was held on the last day of the workshop on 18.2. 2021.The participants were had an informative FDP on all the topics and their feedback was collected.

About the Faculty Development Program

This FDP explores the evolution of VLSI technology and also CMOS digital design ic design using the most popular hardware description languages. This FDP enables the participants to understand the syntax of Verilog HDL and hands on experience on different Digital IC design systems using Verilog regarding simulation, synthesis and implementation on CMOS with real time problems

Eligibility for Participants:

The faculty members from ECE and EEE Engineering of the AICTE approved institutions, research scholars, PG Students and participants from Government and industry members.

REPORT ON FDP on “INTERNET OF THINGS AND ITS APPLICATIONS” :

The Siddhartha Institute of Engineering and Technology organized a one-week Faculty Development Program Titled “INTERNET OF THINGS AND ITS APPLICATION” filled FDP was conducted in ECE dept from 20/01/2020 to 25/01/2020. The FDP had a fair number of participants which included research scholars, faculty from SIET and other colleges.

The resource person was Dr. BhagyaRaju an eminent prof from GNITC. The FDP also included speakers from SIET, Dr.D. Subbarao, Dr.K.FarhaAnjum, Mrs N. Malathi gave insights about embedded system technology and seminars-based applications.

The FDP aimed to deliver detailed description of embedded systems and the introduction to IOT along with the real time application of IOT.

IOT is basically a system inter related computing devices mechanical and digital machines objects , animals or people the are provided with unique identifies 's and can transfer data over a network without requiring human intervention IOT ecosystems ,working of IOT,real time IOT applications were discussed in detail in the FDP the communication protocols were use of artificial intelligence and machine learning which aids for data collection all the concepts were explicitly delivered by prof BhagyaRaju

Topics Covered:

- Introduction to IOTs and its applications
- IOT Hardware & Standards
- IOT Communication/Application Protocols
- Resource provisioning in Fog and Cloud
- IOT with Fog & Cloud
- Machine learning for IOT/WS Ns
- Demonstration on IOT Project
- Hands-on sessions on IOT applications
- State-of-art research in IOTs and WS Ns

Arduino, platform IOT tools for iot were practically explained in the FDP

The Participants got a detailed understanding of IOT and its applications

Ranga Reddy District-501 506.

When a real time examples of smart city and home automation were death in the 7000

The fdp there touse on the IOT evolution applications challenges in the futuristic real time environment.

We have invited renowned and experienced resource person namely

Dr. V. Bhagya Raj, Professor in ECE dept, GNIT.

The inaugural ceremony was on 20JAN 2020 and was hosted by Honourable Chairman Dr. G. Nagaiagh and Principal D.E.L. Nagesh, in presence of Chief Guest of the function Dr.V. Bhagya Raju, Guest of Honor & Prof. Department of Electronics and Communication Engineering, GNIT. Dr. D. Subba Rao, Coordinator and

Mrs. N. Malathi Co-Coordinator of the FDP, Faculty members of the institute and Participants were present.

The valedictory event was held on the last day of the workshop on 25.01.2020.The participants were had an informative FDP on all the topics and their feedback was collected.

About the College

Siddhartha Institute of Engineering & Technology was established in 2008, promoted by Siddhartha Group of institutions which has been in educational field for the past 25 years and produced 20,000 graduate students since its inception. The college is offering UG Courses CSE, CSE-AI&ML, CSE-DS, ECE, EEE, MECH, CIVIL, and PG Courses THERMAL, CAD/CAM, STRUCTURAL, COMPUTER SCIENCE, POWER SYSTEMS, VLSI, VLSI & EMBEDDED & MBA branches and aiming for perfection in engineering and management education. It is constantly striving for all round development of the students. Apart from regular academic courses, the college encourages co-curricular activities like seminars, workshops, symposiums etc.

About Department

The Department of ECE has commenced right from the inception of this college in 2008 with an intake of 60 and subsequently increased to 120 by 2009. The Department also offers PG course (VLSI, VLSI & EMBEDDED) with an intake of 18. The Department is well equipped with 12 labs, each with a capacity of 30 systems and updated licensed software's are installed. The Department provides R&D lab with an internet connection of 24 systems for staff and students to take up their research work. The Department encourages the staff and students to publish papers and to participate in various workshop and events. The Department has a very good track record of placements into various companies like Infosys, Samsung, Astra Microwave pvt limited, TCS etc. The Department also has a tie up with various Multi National Companies which offers training in latest technologies, placements and Internships. The department possesses PhD's, 3 faculty pursuing PhD's and 20 M.Tech faculty.

About the Faculty Development Program

This FDP explores the evolution of VLSI technology and also CMOS digital design ic design using the most popular hardware description languages. This FDP enables the participants to understand the syntax of Verilog HDL and hands on experience on different Digital IC design systems using Verilog regarding simulation, synthesis and implementation on CMOS with real time problems.

Eligibility for Participants:

The faculty members from ECE and EEE Engineering of the AICTE approved institutions, research scholars, PG Students and participants from Government and industry members.

Registration Link:

Interested candidates can register through the registration link at (paste the link in browser):

REPORT ON ENTERPRENURSHIP DEVELOPMENT PROGRAMME

The word 'Entrepreneur' originates from the French term 'Entrepreneur' which means a person, who undertakes the task of bringing together various resources such as money, materials and people and manages them to achieve desired results and takes some share ' In any new venture an entrepreneur has to face certain risks and the profit he gets is the reward for risk bearing. Entrepreneurship involves the performance of various functions like seeking investment and production opportunity, organising an enterprise to undertake a new production process, raising capital, hiring labour, arranging the supply of raw materials, finding site, introducing new techniques and commodities, discovering new sources of raw materials and selecting top managers for day to day operations of the enterprise. "Entrepreneurship and Enterprise could be used interchangeably meaning the willingness to assume risk in undertaking an economic activity particularly a new one.

" The entrepreneur is one who innovates, assembles inputs, chooses managers and sets the organisation going with his ability to identify opportunities which others are not able to identify and is able to fulfill such economic opportunities. Innovation occurs through introduction of a new quality in a product, discovery of fresh demand and sources of supply and bringing about changes in the organisation. The true entrepreneur is one who always searches for change, responds to it and exploits it as an opportunity Entrepreneurs have to learn to practice systematic innovation. The history of entrepreneurship indicates that entrepreneurs share common origins and common characteristics. It is evident from American history that an average entrepreneur was the son of parents in comfortable financial circumstances, neither very wealthy nor very poor.

The characteristics of entrepreneurs are - desire for achievement, willingness for responsibility, preference for moderate risk, perception of probability of success, stimulation by feed-back, energetic activity, future orientation, skill in organising and attitude towards money. ' An entrepreneur is a decision maker and the functions of an entrepreneur are - the determination of objectives of the enterprise, development of cordial relationship with subordinates and all

employees, securing adequate financial resources from potential investors, acquisition of efficient technology and equipment, development of market for the products, devising new products to meet the consumer's demand and maintenance of good relationship with public authorities and with the society at large. Modern writers on this subject have outlined the broad functions of the entrepreneur as innovation, risk taking and organisation and management.

Entrepreneurship represents certain qualities and traits which distinguish entrepreneurs from non-entrepreneurs. If these qualities and traits are possessed by individuals or institutions they qualify to be entrepreneurs. The various types of entrepreneurs are innovative entrepreneurs, adaptive entrepreneurs, exploitative entrepreneurs, fabian entrepreneurs, drone entrepreneurs, forced entrepreneurs, institutional entrepreneurs, individual entrepreneurs and the like. Entrepreneurial Development is essentially an educational process and an endeavour in human resource development. Entrepreneurship cannot grow in a vacuum and it requires an environment in which an entrepreneur can learn and discharge his functions. Stepanek identifies intelligence, motivation, knowledge and opportunity as the pre-requisite for entrepreneurial development.

Development of an entrepreneur means inculcating entrepreneurial traits into a person, imparting the required knowledge, developing the technical, financial, marketing and managerial skills and building the entrepreneurial attitude. The process of entrepreneurship development involves equipping a person with the information used for enterprise building and sharpening his entrepreneurial skills. Entrepreneurial Development is an organised and systematic development. It is now regarded as a tool of industrialisation and solution to unemployment. The objective of entrepreneurship development is to motivate a person for an entrepreneurial career and to make him capable of perceiving the opportunities for enterprise. The trained entrepreneurs are the catalysts of development of industry and economic progress.

About the College:

Siddhartha institute of engineering and Technology was established in 2008, promoted by Siddhartha Group of institutions which has been in educational field for the past 25 years and produced 20,000 graduate students since its inception. The college is offering UG & PG Courses CSE, ECE, EEE, MECH, CIVIL, THERMAL, CAD/CAM, STRUCTURAL, COMPUTER SCIENCE, POWER SYSTEMS, VLSI, VLSI & EMBEDDED & MBA branches and aiming for perfection in engineering and management education. It is constantly striving for all round development of the students. Apart from regular academic courses, the college encourages co-curricular activities like seminars, workshops, symposiums etc. This national Level Technical Symposium is a part of such activities being conducted every year. The college is flourishing well with good teaching strategies and acquiring good results.

Faculty Development Programme:

The theory of outcome Based Education focuses on the skills and results achieved by the student as the most important aspect of education. According to this theory, the use of assessments, opportunities, and classroom experiences should all provide necessary support for the students to achieve their goals.

Topics to be focused:

- Overview of NBA & its process.
- NBA SAR & Documents required.
- Direct & Indirect Tool for assessment.
- Attainment of CO's, PO's, PEO's & PSO's. Hands-on Practice.
- Visit to Departments.

Resource Persons:

1. Dr. E S M S Suresh, professor, NITTR Chennai
1. Dr. B.K.Madhavi, Professor of GNITC.
3. Dr.M.Madhavi Latha, Professor & Coordinator of IQAS JNTUH

Eligibility:

The programme is opened to the faculty working under the AICTE approved engineering colleges and Research Scholars and Technocrats those who are working in industries.

Registration:

A filled in form of application in the prescribed format duly signed by appropriate authorities should reach us by post or e-mail.

The registration fee is **Rs 1000**. It can be paid on the first day at spot registration counter.

Important Dates:

Last date for receipt of application: 02-06-2015

Intimation to selected candidates: 09-06-2015

Registration: 12-06-2015

REPORT ON NBA ACCREDITATION PROCESS

The standard operating practices to be followed by the accreditation team at the time of report writing are given below

1. The worksheet i.e., awarding of point must be used for report writing. The report should not be in contradiction with point sheet/guidelines with points awarding. All point sheet/guidelines with marks awarded must be signed by evaluators.
2. The report of the evaluators must not contradict the marks/points awarded, the strengths may be in an area where the score is more than 80%; the weaknesses may be in an area where the score is less than 70%. In case of a disagreement between two evaluators, the reasons for disagreement must be recorded with reasoning and, if possible, with evidence.
3. The report of the chairperson should contain the gist of conversation with the evaluators on phone and/or video conferencing; gist of discussion and strategy drawn on the evening prior to the commencement of visit; common strengths and weaknesses reported by evaluators of various programmes; comments on the findings or disagreements. In case of a disagreement, the reasons must be recorded with reasoning and with evidence, if possible.
4. The evaluation team of each programme will submit online consolidated evaluation report which is given in the NBA website along with electronic signatures of the evaluators of that programme and the chairperson. The online format of the consolidated evaluation report should have the following structure:
 - a. General information: Inputs which include name and address of the institution, description of programme(s) evaluated, dates of visit and names and affiliation of the evaluators and the chairperson.
 - b. Evaluation Report: This report contains points awarded by the evaluators to each items in all criteria

along with the remarks.

- c. Evaluation Summary Sheet: It contains the evaluator's report about the strengths, weaknesses and deficiencies, if any; additional remarks, if any, and summary of evaluation, along with specific remarks for those criteria in which points awarded are less than the qualifying points.
- d. Chairperson's Report: It contains the chairperson's report on the strengths, weaknesses and deficiencies, if any.

REPORT ON STUDENT PSYCHOLOGY

This guide introduces you to the world of psychological report writing. As part of the specification you should have knowledge of the conventions of reporting research in a practical report and demonstrate understanding of the role and purpose of each of the main sections and sub-sections.

The sections and sub-sections that you will be learning about are: abstract, introduction, method (design, sample, materials/apparatus, procedure), results, discussion, references and appendices. As part of this, you should also have a familiarity with citing academic research using the Harvard system of referencing.

The guide begins by setting the scene of psychological report writing by comparing the essential ingredients of report writing to Natural Sciences writing of lab reports. The writing of lab reports in Science lessons was probably the first a taste of report writing that you experienced.

The guide then looks at how you may have encountered psychological report writing in the form of studies presented to you by in psychology lessons and seeks to build on these foundations. Next, essential ingredients in psychological report writing will be highlighted with some activities.

Hopefully you will find this guide digestible, easy to follow and, most importantly, it will help you conduct your own lab experiments confidently and unlock the best aspect of psychology – using psychological tools to explore the human world.

Aims and Objectives

- To examine psychological report writing.
- To understand the wider connection of psychological report writing.
- To understand the essential ingredients of psychological report writing.
- To consolidate and make connections of learning in of content in other parts of the AS/A Level course.

- To be able to apply understanding of novel situations to assist in the process of psychological report writing.

Formative Assessment

Activities in the guide are designed to regularly check, build and consolidate knowledge in all aspects of AS/A Level Psychology course.

Summative Assessment

To assist with the practical activities feature all students are expected to conduct and write about in examination conditions.

REPORT ON ENTERPRENURSHIP DEVELOPMENT PROGRAMME

The word 'Entrepreneur' originates from the French term 'Entrepreneur' which means a person, who undertakes the task of bringing together various resources such as money, materials and people and manages them to achieve desired results and takes some share. In any new venture an entrepreneur has to face certain risks and the profit he gets is the reward for risk bearing. Entrepreneurship involves the performance of various functions like seeking investment and production opportunity, organising an enterprise to undertake a new production process, raising capital, hiring labour, arranging the supply of raw materials, finding site, introducing new techniques and commodities, discovering new sources of raw materials and selecting top managers for day to day operations of the enterprise. "Entrepreneurship and Enterprise could be used interchangeably meaning the willingness to assume risk in undertaking an economic activity particularly a new one." The entrepreneur is one who innovates, assembles inputs, chooses managers and sets the organisation going with his ability to identify opportunities which others are not able to identify and is able to fulfill such economic opportunities. Innovation occurs through introduction of a new quality in a product, discovery of fresh demand and sources of supply and bringing about changes in the organisation. The true entrepreneur is one who always searches for change, responds to it and exploits it as an opportunity. Entrepreneurs have to learn to practice systematic innovation. The history of entrepreneurship indicates that entrepreneurs share common origins and common characteristics. It is evident from American history that an average entrepreneur was the son of parents in comfortable financial circumstances, neither very wealthy nor very poor. The characteristics of entrepreneurs are - desire for achievement, willingness for responsibility, preference for moderate risk, perception of probability of success, stimulation by feed-back, energetic activity, future orientation, skill in organising and attitude towards money. An entrepreneur is a decision maker and the functions of an entrepreneur are - the determination of objectives of the enterprise, development of cordial relationship with subordinates and all employees, securing adequate financial resources from potential investors, acquisition of efficient technology and equipment, development of market for the products, devising new products to meet the consumer's demand and maintenance of good relationship

with public authorities and with the society at large. Modern writers on this subject have outlined the broad functions of the entrepreneur as innovation, risk taking and organisation and management. Entrepreneurship represents certain qualities and traits which distinguish entrepreneurs from non-entrepreneurs. If these qualities and traits are possessed by individuals or institutions they qualify to be entrepreneurs. The various types of entrepreneurs are innovative entrepreneurs, adaptive entrepreneurs, exploitative entrepreneurs, fabian entrepreneurs, drone entrepreneurs, forced entrepreneurs, institutional entrepreneurs, individual entrepreneurs and the like. Entrepreneurial Development is essentially an educational process and an endeavour in human resource development. Entrepreneurship cannot grow in a vacuum and it requires an environment in which an entrepreneur can learn and discharge his functions. Stepanek identifies intelligence, motivation, knowledge and opportunity as the pre-requisite for entrepreneurial development. Development of an entrepreneur means inculcating entrepreneurial traits into a person, imparting the required knowledge, developing the technical, financial, marketing and managerial skills and building the entrepreneurial attitude. The process of entrepreneurship development involves equipping a person with the information used for enterprise building and sharpening his entrepreneurial skills. Entrepreneurial Development is an organised and systematic development. It is now regarded as a tool of industrialisation and solution to unemployment. The objective of entrepreneurship development is to motivate a person for an entrepreneurial career and to make him capable of perceiving the opportunities for enterprise. The trained entrepreneurs are the catalysts of development of industry and economic progress.
