The Green Policy of the Institution

Siddhartha Institute of Engineering and Technology (SIET) endeavors to implement a human environmental co-existence model promoting welfare of the society through environmental protection. The policy encourages National and International benchmark for a social and environmentally sustainable campus and set an action plan for environmental culture, management and conservation. The Green Policy of the Institution covers the following points.

The Institute should abide by the policy and follow the regulations in the matters of its future developments, infrastructure, constructions and action plans Institute shall integrate environmental concerns into its every day practice

The institute should practice conservation and utilize the natural resources as per environmental laws, regulations and standards for protecting the environment. The Institute should foster a culture to support and promote the principles and values of social and environmental sustainability.

Institute should make a commitment to reduce consumption and wastage of energy. And explore renewable energy sources as far as possible. In order to do this, the Institution should establish and maintain strategic partnerships with the students, staff local governing bodies, private companies and NGOs to develop and promote environmentally sustainable practices through MOUs wherever required.

The institute should establish a Sustainable Environment Management Committee (SEMC). The committee should be empowered to make decisions and execute them regarding the sustainable environment management of the campus. The committee should strictly follow the laws and regulations set by the State government in order to reduce harmful effects on the environment, human health and safety.

Institution should explore the possibilities of adopting eco-friendly culture and green buildings. The built environment of the Institution should reflect Institution commitment towards ecology as far as possible.

Institution should be committed towards ensuring the quality of food purchased, prepared and served in the canteen towards enhancing the health of the campus community and the environment.

Some of the key areas that the SEMC should concentrate adherence to the Green Policy guidelines are as given below:

The Institute should try and meet its energy needs by using local and renewable energy sources to the extent possible.

Reduce electricity consumption. Awareness should be given to the staff and students regarding the energy wastage.

The large roof top area of the institute can be installed with solar energy panels. Solar heating technology can be introduced for hot water requirements.

Waste management:

Building up a system – As per the green protocol, the institute should segregate and manage the waste. Constant efforts should be made for building up a fully functional system for waste management which should rest on the principle of reduce, re-use, repair, replenish and recycle.

Awareness should be given to the entire Institution community on waste management and waste segregation.

Green Auditing: Green audits should be conducted by a third party on regular basis to ascertain the adherence to the policy.

Environment Management Fund:

The Institute should constitute an Environment Management Fund which can be utilized for recurring expenditures to ensure a sustainable campus. The maintenance of green area, furniture and reusable assets, alternative energy sources like solar panels, the rain water harvesting system and biogas plant should be taken care by this fund. The decision regarding the mobility of this fund should be reviewed by the SEMC.
